

The Geographic North Pole

From **8/7/2022**
to **23/7/2022**

Ship: **LE COMMANDANT CHARCOT**

From **Longyearbyen, Spitsbergen**
to **Longyearbyen, Spitsbergen**

Push the limits of sailing with this exceptional 16-day expedition cruise to the **Geographic North Pole**.

To reach this mythical point 700 km away from any emerged land, you will board *Le Commandant Charcot*, the first hybrid electric polar exploration vessel.

Setting sail from Spitzbergen, you will enjoy an unforgettable maritime experience at the heart of sumptuous landscapes that are constantly evolving according to changes in the ice and the light. This itinerary, which lends itself perfectly to the observation of the **wildlife, particularly rich at this time of the year**, will take you as far as the **pack ice**. Then you will slowly progress to the heart of this silent world, frozen by the extreme cold, in the direction of the Grail of all polar explorers: the North Pole!

Swept by the winds and the currents, the ice floe is constantly drifting and the master of your ship will have to manoeuvre carefully and with great humility in an attempt to reach the northernmost point of our planet.

We are privileged guests in these extreme lands where we are at the mercy of weather and ice conditions. Our navigation, mainly in the fjords, will be determined by the type of ice we come across; as the fast ice must be preserved, we will take this factor into account from day to day in our itineraries. The sailing programme, outings, activities and observation of fauna cannot be guaranteed and are subject to weather and ice conditions. The experiences are unique and vary from day to day and for each departure. The Captain and the Expedition Leader will make every effort to ensure that your experience is as rich as possible, while respecting safety instructions and regulations imposed by the AECO.
